

NEW OFFER!

ADMAR company has reached end of project titled/called „implementation of technology for the production of ready-made candy floss on an industrial scale” partly refunded from European Regional Development Fund in Regional Operational Programme of the Silesia Voivodeship for 2007-2013 so in final result proudly we are able to introduce you a brand new product:

Twisted two-colored (double flavour/two flavours) cotton candy in a cup
In result of that project ADMAR company has changed whole production line from hand-made to fully automation production. Therefor now we are one of very few on market with twisted two-colored with two flavors candy floss in cup which can be combined with use of flavours :

- ◆ vanilla
- ◆ banana
- ◆ strawberry
- ◆ apple
- ◆ orange
- ◆ buuble gum

Fully automation of production line has helped us improve quality of our products, as well as taste and smell. Also we were able overcome problem with tinny sugar crystals sticking to underneath of closing lid . In addition to that we were able to minimalize risk of any unwanted pollution getting into candy floss during production process or meanwhile packing cotton candy into cups.

Project helped us with increasing quality of our previous product: one-colored candy floss
